

The SQL UPDATE Statement

The UPDATE statement is used to modify the existing records in a table.

UPDATE Syntax

```
UPDATE table_name
SET column1 = value1, column2 = value2, ...
WHERE condition;
```

NOTE: Be careful when updating records in a table! Notice the WHERE clause in the UPDATE statement. The WHERE clause specifies which record(s) that should be updated. If you omit the WHERE clause, all records in the table will be updated!

```
Update Students
Set Name = 'Lokesh' ,Branch='Aero'
where Reg_No=20184149
```

UPDATE Multiple Records

```
Update Students
Set Name = 'XYZ'
where Branch = 'CSE'
```
